

SIXGILL

Avalon + Sixgill

A Perfect Union

In the battle against today's threats, having access to the right intelligence at the right time is critical to staying ahead of the adversary. Avalon is the first platform built to combine link analysis, collaboration, and reporting processes into a seamless flow - streamlining the investigation process and helping analysts work more efficiently. Together, the integration between Avalon and Sixgill empowers your security teams to easily visualize and enrich threat intelligence from Sixgill's Darkfeed, and other preferred sources within a single Avalon workspace.

Integration Highlights

Integrate Diverse Data Sources

Conduct investigations efficiently by seamlessly integrating threat intelligence from Darkfeed and other sources into a single Avalon workspace.

Interact in Real-Time

Enable real-time, secure collaboration across teams - or across your industry - to eliminate silos and increase analysis efficiency.

Visualize Threats and Connections

Quickly visualize, search and enrich IOCs including malicious domains, URLs, IP addresses, and file hashes gathered from closed-access sources in the cyber underground. The intelligence stream also offers a deeper level of context, providing the actor name and source details that can be used to automate your actions and accelerate your triage.

Deliver Results

Eliminate email chains and manual administrative tasks by easily creating, reviewing and delivering finished intelligence directly from Avalon. With the Darkfeed integration, organizations can receive early warnings of new threats as they develop on the dark web and preemptively block IOCs before they infiltrate their infrastructure.

Preserve Investigations

Create a centralized knowledge repository to maintain the latest investigative intelligence that can be utilized for future investigations.

Integration Benefits

- Quickly unify, visualize, and enrich IOCs with Darkfeed's real-time, automated threat intelligence as well as maximize analysis and reporting efficiency - recouping 200+ hours per analyst per year
- Easily deliver reporting to key stakeholders throughout the organization
- Enable analysts to focus on what they do best - security - instead of administrative tasks
- Preserve past analysis to enrich future investigations

Avalon Streamlines Security Teams' Intelligence access and Investigations

Avalon provides analysts' with an integrated workbench that combines threat intelligence data, analyst tools, and collaboration in a single workspace. Avalon makes threat intelligence accessible and shareable for all organizations - no matter what size or level of security maturity.

Key Stakeholders

King and Union

King and Union enables security teams to easily create and deliver the right intelligence to the right person across all levels of their organization by unifying data from multiple tools and results from investigations into a single cyber analysis delivery platform. With our platform, Avalon, security teams can quickly visualize threat data and investigate together in real time, and once complete, efficiently create and deliver the finished intelligence required to key stakeholders. Avalon reduces the time on manual, administrative tasks, leaving analysts more time to focus on security, and empowers organizations to take full advantage of the security investments they've made - in people, information and technology.

Sixgill

Sixgill's fully automated threat intelligence solutions help organizations fight cybercrime, detect phishing, data leaks, fraud and vulnerabilities as well as amplify incident response -- in real-time. Sixgill's investigative portal empowers security teams with contextual and actionable alerts along with the ability to conduct real-time, covert investigations. Rich intelligence streams such as Darkfeed™ harness Sixgill's unmatched intelligence collection capabilities and deliver real-time intel into organizations' existing security systems to help proactively block threats. Current customers include global 2000 enterprises, financial services, MSSPs, governments and law enforcement entities.
